

FIFA World Cup 2026 Private Prediction Game – Complete Detailed Specification

App Name: World Cup Bets 2026 (or Hebrew name you choose)

Target Users: Private group of 5–10 friends

Platform: Mobile-first PWA (phones only – no desktop support needed)

Language: 100% Hebrew (full RTL support everywhere)

Design Goal: Clean, modern, dark, football-night vibe – simple but premium feel

1. Core Rules & Scoring (Exact)

Per Match Scoring

- Exact score correct → **3 points**
- Correct winner, wrong score → **1 point**
- Wrong winner → **0 points**
- If no prediction submitted → automatic **0 points**

Doubles

- One double available for **Group Stage**
- One double available for **Knockout Stage**
- When used: all points from that match ×2 (so 0 / 2 / 6)
- User chooses the double when submitting/editing the prediction

Tournament Winner

- 8 points if correct
- Must be submitted before the first match of the tournament starts
- Hidden from everyone until the first match begins

Leaderboard Sorting

1. Total points
2. Number of exact scores (3-point predictions)
3. Number of correct winners (1-point predictions)

Prediction Window

- Can submit or edit until exactly **5 minutes before kick-off**
- After that → locked

Privacy

- Other users' predictions are completely hidden until the match starts

Push Notification

- Only one type: "One hour until kick-off" – sent **only** if the user has not yet submitted a prediction for that match

2. Tech Stack (Exact – for Claude)

- **Framework:** Next.js 14 (App Router) + TypeScript
- **Styling:** Tailwind CSS + shadcn/ui components
- **Database:** Supabase (PostgreSQL) – free tier
- **Auth:** Custom 4-digit PIN (hashed with bcrypt)
- **PWA:** Full PWA support (manifest + service worker)
- **Images:** Supabase Storage for channel logos
- **Football API:** TheSportsDB free tier. Api key 123, league id: 4429. documentation: <https://www.thesportsdb.com/documentation>
- **Time Zone:** Automatic conversion to Israel time (UTC+3 / UTC+2)
- **State:** Zustand
- **Hebrew Fonts:** Use system-ui with Hebrew fallback

3. Design System (Very Detailed – Claude must follow exactly)

Colors

- Background: #0a0a0a
- Card background: #171717
- Text primary: #f8f8f8
- Text secondary: #a3a3a3
- Primary accent: #f97316 (orange)
- Gold accent: #eab308
- Danger/Warning: #b91c1c (burgundy red)

- Success: #22c55e

Typography

- Font: Inter (or system-ui)
- Headings: bold, 18–24px
- Body: 16px normal
- Small text: 14px

Components Style

- Cards: rounded-2xl, border border-gray-800, subtle shadow
- Buttons: large, rounded-xl, full width on mobile, bold text
- Badges: rounded-full, small padding, bold
- Match cards: large emoji flags (or SVG), clear separation
- Status badges: small, uppercase, very visible

Overall Feel

- Dark theme only
- Lots of breathing room (padding 16–24px)
- Very clean and modern – no clutter

4. Navigation (Bottom Tabs)

1. **משחקים** (Matches) – default tab
2. **בתיים** (Groups)
3. **טבלה** (Leaderboard)
4. **פרופיל** (Profile)

5. Detailed Screens

5.1 Login Screen

- Centered 4-digit PIN input (large number buttons)
- Hebrew text: “הזן סיסמה בת 4 ספרות”

5.2 First Login – Change Password

- Forced screen after first login
- “בחר סיסמה חדשה בת 4 ספרות”

5.3 Tournament Winner Banner

- Thin fixed bar at the very top of **every tab** (height ~42px)
- Background: #b91c1c or #f59e0b
- Text: “עדיין לא בחרת את המנצחת של המונדיאל – לחץ כאן”
- Very noticeable but thin (small font, little padding)
- Disappears only after user chooses winner
- Clicking it opens the winner selection screen

5.4 Matches Tab

- Paginated: 10 matches per page
- Default view: automatically scrolls so the **next upcoming match** is in the 5th position (4 before + 5 after)
- Each match card contains:
 - Date + time (Israel time, big)
 - Status badge (top right)
 - Two large flags + Hebrew team names
 - Stadium, city, country
 - Channel logo + channel name (if assigned)
 - **Your prediction area:**
 - If not submitted → big orange button “הגש תחזית עכשיו”
 - If within 60 minutes and not submitted → button becomes orange + text “הזדמנות אחרונה – הגש תחזית”
 - If already submitted → your score (e.g. **2 - 1**) + small “x2” icon if double used
 - For finished matches: real final score shown, winning team name bolded

5.5 Match Detail Screen

- All match info at top
- Score input fields (large)
- Toggle “הכפל נקודות” (only if double still available, grayed out otherwise)
- After match starts: list of **all players’ predictions** sorted by points earned on this match (highest first)

- Show points earned next to each prediction (+3, +6, +1, +0)

5.6 Groups Tab

- 2 columns × 6 rows grid
- Each group box shows group letter + 4 teams with flag + Hebrew name + current points (0 at start)

5.7 Leaderboard Tab

- Normal leaderboard during tournament
- After final match ends: top section becomes **podium** (1st gold, 2nd silver, 3rd bronze) with big medals/flags
- Rest of players in normal list below
- Leaderboard hidden from all users during the final match only

5.8 Profile Tab

- My total points + current rank
- Exact scores count
- Correct winners count
- Success rate %
- Doubles remaining (Group + Knockout)
- My champion pick + flag next to my name
- All my personal statistics

5.9 Admin Panel (Protected by separate simple admin 4-digit password)

Two main sections:

A. Data Management

- **Teams** – edit Hebrew names + flags for all 48 nations
- **Venues** – edit stadium name, city, country (all in Hebrew)
- **Channels** – add/edit 2-3 channels: name (Hebrew) + upload logo image

B. Matches

- View all matches (from API)
- Edit date/time, assign channel from dropdown, manually set final score
- Manually edit any user's prediction (retroactive)

- Button to recalculate points for that match

6. Database Schema (Exact)

(You can give Claude the full schema later if needed – but include this in the prompt)

7. Important Behaviors

- All times automatically converted to Israel time
- Matches ordered strictly by date/time
- Hebrew data entered once by admin in Data Management section
- Man of the Match: any player who gets 3 or 6 points on a match gets marked (multiple possible)
- At end of tournament: show “Best Precise Predictor” (most exact scores)

Instructions for Claude:

Build this app **exactly** as described. Use Next.js 14 + Tailwind + shadcn/ui. Make the design exactly match the Design System above. Do not improvise styling – follow the colors and style strictly. Start with Supabase schema, then auth, then Matches tab.
